Preface	
<i>Miguel Ángel Ballesteros Marín</i>	
<i>Arturo Gonzalo Aizpuri</i>	
Introduction	
<i>Claudio Aranzadi</i>	
The new publication “Energy and Geostrategy 2015”	11
Complexity and uncertainty in the global energy environment.....	11
Oil supply as a central geostrategic factor.....	15
Europe and the global geostrategic energy framework.....	20
Energy Equality and Geostrategy.....	26
Chapter I	
Review and international prospects of nuclear power in 2014	29
<i>Antonio Colino Martínez</i>	
Introduction	29
Nuclear power plants	31
<i>Electricity production in nuclear plants</i>	31
<i>Installed capacity at nuclear plants</i>	32
<i>Age of the world's nuclear plants</i>	34
<i>Types of reactors in nuclear plants</i>	35
<i>Security in the electricity supply</i>	36
<i>Nuclear plant operational safety</i>	37
The nuclear fuel cycle	37
<i>Initial part of the nuclear fuel cycle</i>	37
<i>Security at the final part of the nuclear fuel cycle</i>	43
Economics of nuclear energy	46
Nuclear energy sustainability	49
Construction of new nuclear power plants	49
<i>Nuclear plants under construction</i>	49
<i>Starting of new nuclear plants</i>	50
<i>Reactors used to produce electricity and for other purposes</i>	51

	Page
Prospects of nuclear electric power	51
<i>Predictions from International Bodies.....</i>	51
<i>Comparison of high and low projections</i>	53
<i>Factors affecting the projections.....</i>	54
Conclusions	57
Documentation used in preparing this report.....	57
 Chapter II	
Energy and the Arctic	59
<i>Vicente López-Ibor Mayor</i>	
The arctic and geopolinergy.....	61
Environmental degradation and the arctic paradox	65
The arctic states and their energy resources.....	69
The European Union and the Arctic: the energy question.....	77
The Arctic as an alternative energy transport route.....	82
The difficult arctic governance and energy.....	90
 Chapter III	
Universal access to electricity and its role in the fight against poverty	93
<i>Carlos Sallé Alonso</i>	
Introduction	95
The connection between security, poverty, resource management and sustainable development.....	98
<i>The new Security approach</i>	98
<i>Population and Poverty in the World</i>	99
<i>Resource Management and Development perspectives.....</i>	101
<i>Breaking the vicious circle of poverty</i>	104
Basic concepts	105
<i>Universal Access, Millennium Goals and Sustainable Development Goals</i>	105
<i>Universal access to energy: extent of the challenge. The three gaps: equity, ambition and opportunity</i>	108
<i>Energy Poverty and instruments for overcoming it</i>	113
Definition of Energy Poverty	113
<i>Instruments for reducing Energy Poverty</i>	115
<i>In this article, what is meant by "making access to electricity supply universal"?</i>	
<i>What is meant by "rural electrification"?</i>	116
<i>Most usual mechanisms for electrifying supply in isolated rural zones: grid extensions, mini- and micro-grids and individual household electrification.....</i>	117
<i>What does "double discrimination" mean with reference to clients who do not have grid access?</i>	121
<i>Scalability as a comprehensive solution beyond philanthropy. The role of the private company</i>	121
<i>The importance of Public-Private Partnerships (PPPs)</i>	123
<i>Universal access to energy and businesses at the bottom of the pyramid. Payment capacity and sustainable solutions</i>	124
<i>Reverse innovation and utility of the future: other benefits provided by universal access to electricity supply</i>	128
<i>Universal Access to Supply and Climate Change</i>	132
Key Elements in Universal Access to Electricity Projects	133
<i>Governance Models and Stakeholders Involved. A Multi-stakeholder Solution.....</i>	133
Governments.....	134
The beneficiary communities	135

	Page
Non-Governmental Organisations (NGOs)	135
Volunteers, specialist volunteers and retired specialist volunteers	136
The private sector	137
Universities and Academies	139
Multilateral Institutions	140
<i>Some of the many stages for guaranteeing the success of a Universal Access to Electricity Supply project</i>	140
Pinpointing the need	141
Process of allocating very scarce resources. Welfare optimisation models	141
Synergies	144
Technical solutions	144
Collecting information	144
Environment	145
Analysis of Potential Collateral Effects	145
Regulatory and pricing framework	146
Sustainability of the projects in time	147
<i>Some examples of Universal Access to Electricity Supply programmes</i>	148
«Light for All»	149
Some results of the programme: new opportunities at all levels	152
Global Sustainable Electricity Partnership (GSEP)	155
Energía sin Fronteras Projects (EsF)	156
Regulation of Electrification in Isolated Rural Zones Project (REGEZRA)	157
Isolated Communities Electrification Model Project (MECA)	157
Street Lighting in Benin	158
Electricity supply and communication by radio for 44 medical outposts in the Upper Amazon Basin (Peru)	158
Taba Project: water supply to communities in the Taba Region (Senegal)	159
Electricity for All Programme	159
Light at Home (Peru)	161
Power Africa	161
Lights for Learning	162
Conclusions	162
Bibliography	164
Chapter IV	
Russia and the european energy security	169
Francisco José Ruiz González	
Introduction	170
The russian energy sector and its strategic importance	170
<i>The Russian oil sector</i>	173
<i>The Russian Gas Sector</i>	177
<i>Russian Energy Policy in the post-Soviet space</i>	180
The 2006 and 2009 "Gas Wars" with Ukraine	181
Russia and the energy resources of Central Asia	184
Russia-EU relations in the field of energy	187
<i>Disagreements over the Energy Charter Treaty</i>	189
<i>The infrastructures for supplying Russian gas to the EU</i>	191
<i>A future vision for energy relations in Europe</i>	196
<i>The new projects for supplying Russian gas to the EU</i>	198
The Ukraine crisis: a Russian turn towards Asia-Pacific?	200
<i>The energy dimension of the Ukraine crisis</i>	201
<i>China as an alternative to the EU for Russian exports</i>	203
Conclusions and prospects	206

	Page
Chapter V	
The impact of Middle East conflicts on the energy sector	211
<i>Francisco José Berenguer Hernández</i>	
Introduction.....	212
A zone rich in hydrocarbons encrusted in a region in turmoil.....	215
Regional conflicts	219
<i>The Libyan case</i>	<i>219</i>
<i>The Israel Palestine conflict.....</i>	<i>222</i>
<i>The Civil War in Syria.....</i>	<i>224</i>
<i>The war in Iraq and its regional impact.....</i>	<i>229</i>
<i>Iran and its peculiarities</i>	<i>234</i>
<i>The Hormuz Question</i>	<i>237</i>
<i>Egypt, the Suez Canal and the Gulf of Aden.....</i>	<i>240</i>
<i>The Turkish Transit</i>	<i>244</i>
<i>Monarchies and Revolution</i>	<i>246</i>
Composition of the working group	249
