	Page
Preface	
<i>Miguel Ángel Ballesteros Martín</i>	
<i>Arturo Gonzalo Aizpiri</i>	
Introduction	
<i>Claudio Aranzadi</i>	
The publication "Energy and Geostrategy 2016"	11
Trends in the energy geopolitical scenario	15
Uncertainties concerning decarbonisation policies and the future of oil prices	16
Climate policy forecasts.....	17
Uncertainty in the forecast of oil prices.....	20
Chapter I	
Geostrategy Of Liquefied Natural Gas (LNG)	27
<i>Enrique Locutura Rupérez</i>	
Introduction	28
The LNG Chain	28
Characteristics and Feasibility of the LNG Chain	30
Investments in the LNG Chain	36
<i>Prior conditions to the launching of a project</i>	36
<i>Investments in liquefaction</i>	36
<i>Investments in regasification</i>	38
<i>Investment in LNG carriers</i>	39
<i>Current average investment cost in the LNG chain</i>	40
Natural Gas Prices	40
<i>Background.</i>	40
<i>Mechanisms for establishing gas prices</i>	41
<i>How domestic prices are established by regions</i>	42
<i>Gas prices compared to other energy sources</i>	43
LNG Prices	48
<i>Mechanisms for establishing prices</i>	48
<i>Evolution of LNG prices</i>	49

	Page
LNG production. Where it is produced and future evolution.....	51
<i>Distribution of gas reserves</i>	51
<i>Current LNG production in the world</i>	52
<i>New capacity under construction or design</i>	53
<i>Future post 2020 investments</i>	54
LNG Demand and MID-TERM Evolution.....	56
<i>LNG regasification capacity in the world</i>	56
<i>Major LNG importers</i>	56
The Future of LNG	57
<i>The future of natural gas</i>	57
<i>Future weight of LNG in the energy balance</i>	58
<i>The future of LNG production</i>	58
<i>The future of LNG demand</i>	60
<i>LNG growth in segments and non-conventional markets</i>	60
LNG, a Global Industry in a Globalised World	61
Chapter II	
Geostrategic Overview of Energy Maritime Routes	63
Spanish Energy Security in a Changing Scenario	63
<i>Gonzalo Sirvent Zaragoza</i>	
Introduction.....	64
World Maritime Trade.....	64
<i>Free trade</i>	64
<i>Background</i>	65
<i>Current situation</i>	66
The World's Merchant Marine.....	67
<i>General Overview</i>	67
<i>Oil tanker fleet</i>	68
<i>LNG Carrier Fleet</i>	68
Maritime Energy Routes.....	69
<i>Production, export and consumption of crude oil</i>	69
<i>Production, export and consumption of natural gas</i>	71
<i>Principal maritime routes</i>	74
<i>Trends</i>	76
Principal Risks and Threats on Maritime Energy Routes.....	77
<i>Serious international crisis or armed conflict</i>	78
<i>Terrorist attacks aimed at closing a strategic passage</i>	78
<i>Piracy and armed robbery</i>	79
<i>Serious accident blocking a strategic passage</i>	79
Critical Points and Areas of Special Strategic Interest	79
The Strait of Hormuz	79
The Strait of Bab el-Mandeb	82
The Suez Canal	84
The Straits of Bosphorus and Dardanelles	86
The Danish straits	89
The Panama Canal	90
The Malacca Strait	92
Other zones of interest	94
Freedom of Navigation under the Law of the Sea.....	97
“Maritime Security” on Energy Maritime Routes	99
<i>The Concept of Maritime Security</i>	99
<i>Maritime Situational Awareness</i>	100

	Page
The importance of naval forces	101
Comprehensive approach	101
Final Conclusions.....	102
 Chapter III	
The Impact of Jihadism on the Energy Sector.....	103
<i>Ignacio Fuente Cobo</i>	
The Ideological Foundations of the “Energy Jihad”.....	104
Al Qaeda’s Action Against The Energy Sector In The Arabian Peninsula.....	107
Action by Jihadist Groups Against the Syrian Energy Sector	111
Daesh’s Energy Strategy in Iraq.....	118
Jihad Action Against the Energy Sector in North Africa	124
Control of the Hydrocarbon Sector after the 2014 elections in Libya.....	129
Jihadist Violence and the Destruction of the Energy Sector	132
Future Implications of Jihadist Activity in the Energy Sector.....	133
 Chapter IV	
Oil Prices and Word Geopolitics.....	139
<i>Raúl Cardoso Maycotte</i>	
The 2014-2015 fall in the Oil Prices	142
<i>Analysis of the current international oil market</i>	142
Analysis of the Principal Geopolitical Problems in the middle east and their influence of the behaviour of Oil Prices	148
Impact of iran’s return to the market and geopolitical implications: USA, Israel, Saudi Arabia, Syria and Iraq.....	151
Relevance of Saudi Arabia as a Crude Oil Supplier	155
<i>Saudi Arabia and the adventure into renewable energies.....</i>	155
<i>China, the Great Allied of the Energy Demand</i>	158
Some Conclusions	159
 Chapter V	
The water, energy, food nexus	161
<i>Mariano Cabellos Velasco and Lucila Izquierdo</i>	
Introduction	162
<i>Poverty in the world</i>	162
<i>The Water, Energy, Food Nexus. A global vision of the challenge.....</i>	164
<i>What value does a joint approach to water-energy-food add?.....</i>	166
Current Situation of the Water, Energy and Food Sectors in Development.....	167
<i>Achievements and failures of the MDGs.....</i>	167
Have the MDGs been achieved?	167
<i>The human right to water: situation and principal challenges.....</i>	168
Water resources	169
Access to water	169
<i>Access to energy: situation and principal challenges.....</i>	170
<i>Food security: situation and principal challenges.....</i>	172
<i>The post-2015 development agenda. Universal access to water, energy and food in the SDGs</i>	174
Components of the Water, Energy, Food Nexus	176
<i>The Water - Energy Binomial.....</i>	176

	Page
Water and Food Safety	179
Energy - Food	182
Management of the Water, Energy, Food Nexus	184
Analysis models and methodologies	185
Possible conflicts. Conflicts over water, as an example	188
A major challenge for today's society	191
The Specific Problem of Isolated Rural Communities	192
Isolated rural communities	193
Community management	194
Joint management of water and energy services	195
Practical Cases of Managing the Nexus Resources	198
KENYA: The bio-friendly village of Nyumbani	198
SRI-LANKA and MALAWI. Agroforestry for rural electrification.....	199
JAPAN: Simultaneous production of electricity and crops	200
INDIA: Solar energy over channels	200
WEST AFRICAN CAPITALS. Urban and suburban agriculture.....	201
Composition of the working group	203
