

# INDEX

	Page
<b>Introduction</b> .....	9
<i>Claudio Aranzadi</i>	
<b>Questionnaire of the Senior Vice President, Global Energy and International Affairs at IHS Markit. Mr. Carlos Pascual</b> .....	25
<b>Chapter one</b>	
<b>Strategic rivalry between China and the U.S. in the area of energy</b> .....	37
<i>Isidoro Tapia Ramírez</i>	
<b>First part - China: a map of energy resources</b> .....	43
Introduction .....	43
China's energy mix.....	44
Coal Sector .....	46
Oil Sector.....	48
Natural Gas Sector .....	55
Renewable Energy Sector .....	58
Environmental Commitments.....	61
Energy Planning .....	62
Conclusions .....	64
<b>Second Part. The geopolitics of energy</b> .....	65
The major energy transitions .....	68
The new energy geopolitics .....	74
Conclusions .....	82
<b>Third Part. The Rivalry between China and the USA</b> .....	83
Chinese energy expansionism. Do we have anything to fear? .....	83
The energy "Wei qi": is China in the role of the USA or in the role of Saudi Arabia?.....	88
From commitment to threat: the trade war and the Chinese-US relations ....	92
The COVID-19 Crisis .....	95
Final Considerations.....	97

## Chapter two

<b>Geopolitics in the Eastern Mediterranean: more than just gas</b> .....	101
<i>Felipe Sánchez Tapia</i>	
Introduction .....	105
First Part - The Geopolitics of the EASTMED .....	106
Effects of the Middle East Conflict: the Refugee Crisis .....	110
The Aegean Sea .....	113
Delimiting the Exclusive Economic Zones (EEZ) and Continental Shelf .....	115
Greece - Turkey .....	117
Cyprus - Turkey .....	119
Israel - Lebanon .....	120
Israel - Palestinian Authority (Gaza Strip) .....	121
Syria - Turkey / Syria - Lebanon .....	122
The Energy Factor .....	123
The producing countries: Egypt, Israel, Cyprus .....	126
Exploration Disputes .....	133
Export Potential .....	139
Second Part - Power relations and containment policy in the EASTMED .....	143
Regional Military Power in the EASTMED .....	144
Naval Power .....	144
Air Power .....	146
Balance in Regional Power .....	149
The geopolitics of the major powers: opportunities for global contention ...	152
Russia .....	152
China .....	154
United States .....	156
France and the UK .....	157
Conclusions .....	158

## Chapter three

<b>Electrical sector's security in Spain</b> .....	161
<i>Alberto Carbajo Josa</i>	
Electrical sector's security in Spain .....	165
Introduction .....	165
Adjustment services and supplementary services .....	167
Primary Regulation .....	168
Secondary Regulation .....	168
Availability or regulation band .....	170
Secondary regulation energy used .....	170
Tertiary Regulation .....	171
Deviation management .....	171
Transport network voltage control .....	172
Service resumption .....	172
Electrical protection .....	173
The energy transition .....	174
Renewable energies .....	176
The European electrical system .....	179
The electrical interconnections .....	180

	Page
Second part.....	183
Digitalisation .....	183
Electrical cybersecurity .....	189
Threats and cyberattacks .....	193
Future Trends .....	197
EU action and regulations .....	198
International cooperation in cybersecurity.....	200
Designing protective devices for cybersecurity .....	206
Cybersecurity measures for an existing control system.....	210
The Blockchain .....	213
Applying Blockchain in the energy sector.....	214
Conclusions .....	215
Bibliography.....	217

## Chapter four

<b>Energy sustainability in the defence and security sector – global, European and NATO context</b> .....	219
<i>Manuel Francisco Arribas Tiestos</i>	
<i>David Martín Borreguero</i>	
Global context regarding energy efficiency and climate change .....	223
The Paris Agreement.....	223
European context in relation to energy efficiency and climate change .....	227
European Framework for Climate and Energy: energy policy and strategy. The Energy Union .....	227
EU's targets and legal framework on climate and energy, 2020 .....	230
EU's targets and legal framework on climate and energy, 2030 .....	231
Energy Efficiency Directive (Directive 2018/2002).....	232
Energy Performance of Buildings Directive (2018/844).....	232
Directive on the promotion and use of energy from renewable sources (Directive 2018/2001).....	233
Regulation concerning Governance of the Energy Union and Climate Action (Regulation 2018/1999).....	233
Legislative measures (4) for designing the electricity market .....	234
Long-term strategy for 2050 .....	234
Energy Sustainability in the context of the European Defence Sector. ....	235
The Ministry of Defence's participation in energy sustainability initiatives in the Defence Sector through the European Defence Agency (EDA).....	236
EDA's Energy and Environment Programme.....	236
Smart Blue Water Camps Project (SBWC). ....	237
Smart Energy Camp Technical Demonstrator Project (SECTD).....	239
Data Collection and Analysis and Sharing Project (DCAS).....	242
Defence Energy Managers Course Project (DEMS).....	243
Total Energy and Environment Military Capability Assessment Framework Project (TEEMCAF) .....	243
Overall Strategy Research Agenda (OSRA) and Capability Development Plan (CDP) .....	244
Consultation Forum on Energy Sustainability in the Security and Defence Sector.....	246
Objectives, structure and dynamics of the Consultation Forum.....	246
Achievements.....	248

	Page
Findings, lessons learnt and good practices.....	248
Energy efficiency maximisation project through behaviour changes. UK Ministry of Defence. ....	256
Energy consumption database using smart meters, Austrian Ministry of Defence. ....	257
The CF SEDSS as a think tank for future collaboration projects.....	257
NATO context in relation to energy efficiency and climate change.....	258
Concept of Smart Energy.....	259
Green Defence Framework.....	262
NATO's "Capable Logistician" Exercises.....	265
Ministry of Defence participation in R&D&I projects in NATO's setting.....	266
Research Group SAS-083. Power and Energy in Military Operations (DGAM).....	267
SET-173 Research Group. Fuel Cells and Other Emerging Manportable Power Technologies for the NATO Warfighter.....	268
IUFCV Project (Improving efficiency and operational range in low- power unmanned vehicles through the use of hybrid fuel-cell power systems).....	269
National context regarding energy efficiency and climate change.....	269
Participation of the Ministry of Defence and Armed Forces in R&D&I Initiatives and Projects on a national level.....	273
Projects in the COINCIDENTE (DGAM) Programme .....	273
ATHEMTO Project.....	273
ALPAM Project.....	273
Army Innovation Projects .....	274
GREEN PC.....	274
Variable speed and co-generation generator set .....	274
Antarctic Campaign Office .....	274
Grand Smart Box .....	274
INTA Projects .....	275
Projects by Sub-Directorate General of Air Systems / Energy Area ....	275
Projects by Sub-Directorate General of Land Systems .....	275
ENERGYISIS Project .....	275
MAGYSTER Project .....	275
Conclusions .....	276
<b>Composition of the working group .....</b>	<b>277</b>
